

New version of the Health economic assessment tools (HEAT) for walking and cycling

NEW DATES FOR LIVE ONLINE TRAININGS

WHO/Europe's HEAT for walking and cycling is an online resource to estimate the economic savings resulting from reductions in mortality as a consequence of regular cycling or walking:
www.heatwalkingcycling.org.

Results from HEAT can be used as inputs to cost-benefit-analyses, comprehensive health impact assessments or to make the case for new investment.

Thanks to support from the Swiss Federal Office for Public Health and the

Upcoming free online trainings on HEAT
